

## Press Release

18 December 2009

### **KBC defers decision on New Albion Wind Farm**

Infinergy, the company planning a renewable energy scheme consisting of 7 wind turbines north of Rushton, is pleased that the extensive internal debate between Kettering Borough Council's planning and legal officers has been resolved.

At the Planning Meeting on the 8<sup>th</sup> of December, committee members voted to defer the application in order to avoid the possibility that there could be any grounds for a judicial review which could be a costly and time expensive exercise for all parties involved.

As a precaution KBC have decided to extend the consultation period 21 days as some information could be argued as "additional" to the application. It is important to note that this is a procedural planning issue and has nothing to do with the content of application or any information submitted to the planning authority and it therefore does not prejudge Infinergy's application.

Consequently Kettering Borough Council will be advertising the information and there will be a special planning meeting held to decide on the application on Tuesday 19<sup>th</sup> January 2010.

Charles Sandham, Infinergy's Chief Executive, said: "In close cooperation with KBC's Planning Department, we have put a lot of time and effort into making sure the application is correct in every aspect. We are encouraged by the Council's thoroughness in handling the application and we feel strongly that the democratic planning process should have its proper course."
